Teaching for Societal Impact

Aurora education aims to equip students with the skills needed to become social entrepreneurs and innovators, willing and able to contribute to solving the major challenges of our societies. This is crucial for a sustainable future. Academic teachers who strive to teach for societal impact are the cornerstone of this endeavour.

Are you the teacher of the future?

Explore different Teaching for Societal Impact pathways

Want to expand or reinforce the link between the content of your course and societal challenges? Consider this...

Get involved with one of the **Aurora pilot domains** and gain new perspectives from different academic teachers

Connect your course to the **Sustainable Development Goals** and consider tackling a real-world challenge with your students

Bring different disciplinary perspectives into your course by trying an **interdisciplinary approach**

Want to strengthen the development of student competencies in your course and make them more tangible? Consider this...

The **LOUIS** framework can support you in successfully integrating the development of general competences in your teaching in addition to the subject knowledge

The **SEISMIC** tool can help you define how and measure if your students acquire social entrepreneurship skills in their studies

The **BEVI** analytical tool allows you to measure the impact of your teaching, learning and training activities on the mindsets of your students i.e. their beliefs and values

Want to diversify your course delivery and make it more inclusive and societally relevant? Consider this...

Make your students the centre of your teaching through a **student centred and inclusive** teaching approach

Emphasise collaboration with students and society and connect community service with academic learning by using **co-creation** and **service learning**

Include scientific work under real conditions with human experiences in your course by offering **field work** or **excursions** to your students

Want to use internationalisation to make your courses even more impactful? Consider this...

Bring internationalisation to your students at home by participating in a **Collaborative International Online learning (COIL)** cooperation within your course

Provide **short-term mobility** or **blended mobility** opportunities to your students, allowing also underrepresented student groups in semester long exchanges to have a learning experience abroad

Jointly develop and deliver a new **collaborative course** with academics from other Aurora Universities
