

AURORA Research and Innovation for Societal Impact (SwafS Project)

The Aurora RI project deals with the research and innovation aspects of the Aurora Alliance. The project complements the Aurora Learning for Societal Impact strategy with a long-term Aurora plan towards research and innovation (R&I) for Societal Impact, aiming to support the achievement of the SDGs related to the four priority domains of the Aurora Alliance programme: i) Sustainability and Climate Change, ii) Digital Society and Global Citizenship, iii) Health and Wellbeing, and iv) Culture, Diversity and Identity.

Based on these domains, the project will strengthen research and innovation activities by forming a joint research support agenda and allow the partners to share best practices. Through nine work packages, the project will equip the Alliance members to perform excellent research and work together. The program will start on the *1st of October, 2021*.

Objectives of the project

- ▲ Shared support plan for research and innovation
- ▲ Sharing infrastructure and resources (equipment, data, networks)
- ▲ Strengthening academia – business cooperation
- ▲ Empowering human capital
- ▲ Sharing Open Science practices
- ▲ Engaging Citizens and Society
- ▲ Maximise impact through collaboration with other European Universities
