

# Call for Incentive Research Collaboration 2025 Laureate

## Project WAI@U

Project title: Working with AI at University

**AURORA**

Co-funded by  
the European Union

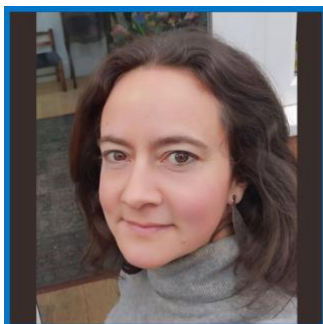

## PROJECT IDENTIFICATION

**Project title:**

Working with AI at University

**Project acronym:** WAI@U

## COORDINATOR

**Principal researcher:**

Claire Marzo

**University:**

University Paris East Créteil (UPEC)  
Law / MIL

**Email:** [claire.marzo@u-pec.fr](mailto:claire.marzo@u-pec.fr)

## PARTNERS

**Principal researcher:**

Liana Razmerita

**University:**

Copenhagen Business School (CBS)  
Department of Management, Society and Communication

**Email:** [lra.msc@cbs.dk](mailto:lra.msc@cbs.dk)

**Principal researcher:**

Adam Jatowt

**University:**

Universität Innsbruck (UIBK)  
Digital Science Center

**Email:** [Adam.Jatowt@uibk.ac.at](mailto:Adam.Jatowt@uibk.ac.at)

## OBJECTIVE

This project aims to study the impact of AI and GIA on work in universities. This research focuses specifically on the three types of work found in universities: administrative work, teaching and research. WAI@U aims to compare the use and reception of G/AI at work in order to identify (IT), categorise, evaluate (Management) and regulate (Law) changes in an international and comparative context with the participation of three universities: UPEC Paris, UIBK Innsbruck, CBS Copenhagen.

## ILLUSTRATION OF THE PROJECT

## SOCIAL IMPACTS AND TARGETED SDG

WAI@U will mostly consist in comparing the key findings of the three partner universities thanks to three international and interdisciplinary conferences each organised by the three partners across the two years of the project. These three conferences in Paris, Copenhagen and Innsbruck will lead to networking, drafting scientific articles and preparing broader EU projects. Each conference will correspond to one of the themes of the project: admin work, teaching and researching.

## **AURORA ADDED VALUE**

The three partners already have national internal projects and they would like to compare their findings. This will contribute to increase knowledge in the field of applied GAI (digital society and global citizenship as in Aurora's hubs). We would like to start building a more international research community on the subject of GAI at work. This funding will allow us to develop our network and maybe start building a European master (either within or like DIGISOC Euridice in link with Aurora).
